Start of construction - includes substantial improvement and other proposed new development and means the date the Permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days from the date of the permit. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufacture home on a foundation. Permanent construction does not include land preparation, such as clearing, grading, and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual start of construction means the first, alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.
31. Structure – a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

32. Subdivision - the division or redivision of a lot, tract, or parcel of land by any means into two or more lots, tracts, parcels or other divisions of land including changes in existing lot lines for the purpose, whether immediate or future, of lease, partition by the court for distribution to heirs, or devisees, transfer of ownership or building or lot development: Provided, however, that the subdivision by lease of land for agricultural purposes into parcels of more than ten acres, not involving any new street or easement of access or any residential dwelling, shall be exempted.
33. Substantial damage - damage from any cause sustained by a structure whereby the cost of restoring the structure to its before-damaged condition would equal or exceed fifty (50) percent or more of the market value of the structure before the damage occurred.
34. Substantial improvement - Any reconstruction, rehabilitation, addition, or other improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure before the "start of construction" of the improvement. This term includes structures which have incurred "substantial damage or "repetitive loss." regardless of the actual repair work performed. The term does not, however include either:
- Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions, or;
  - Any alteration of a "historic structure," provided that the alteration will not preclude the structure's continued designation as a "historic structure."
35. Uniform Construction Code (UCC) – The statewide building code adopted by The Pennsylvania General Assembly in 1999 applicable to new construction in all municipalities whether administered by the municipality, a third party or the Department of Labor and Industry. Applicable to residential and commercial buildings, The Code adopted The International Residential Code (IRC) and the International Building Code (IBC), by reference, as the construction standard applicable with the State floodplain construction. For coordination purposes, references to the above are made specifically to various sections of the IRC and the IBC.
36. Violation - means the failure of a structure or other development to be fully compliant with the applicable flood plain management regulations of Penn Lake Park Borough as set forth in this Article. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in 44 CFR § 60.3(b)(5), (c)(4), (c)(10), (d)(3), (e)(4) or (e)(5) and within this Article is presumed to be in violation until such time as that documentation is provided.

The identified floodplain area shall be any areas of Penn Lake Park Borough, classified as special flood hazard areas (SFHAs) in the Flood Insurance Study (FIS) and the accompanying Flood Insurance Rate Maps (FIRMs) dated December 5, 1980, and issued by the Federal Emergency Management Agency (FEMA) or the most recent revision thereof, including all digital data developed as part of the Flood Insurance Study.

The above referenced FIS and FIRMs, and any subsequent revisions and amendments are hereby adopted by Penn Lake Park Borough and declared to be a part of this ordinance.

SECTION 1220 DESCRIPTION AND SPECIAL REQUIREMENTS OF IDENTIFIED FLOODPLAIN AREAS

Identified floodplain area shall consist of the following specific areas:

**A. Floodway Area**

1. Description - the area identified as Floodway in the FIS which represents the channel of a watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation by more than one (1) foot at any point.

This term shall also include floodway areas which have been identified in other available studies or sources of information for those special floodplain areas where no floodway has been identified in the FIS.

2. Special Requirements:
  - a. Any encroachment that would cause any increase in flood heights shall be prohibited.
  - b. No new construction or development shall be allowed, unless a permit is obtained from the Department of Environmental Protection Regional Office.

**B. Special Floodplain Area**

1. Description - the areas identified as Zones AE and A1-30 in the FIS which are subject to inundation by the 1-percent-annual chance flood event determined by detailed methods and have base flood elevations (BFEs) shown.
2. Special Requirements:
  - a. No new construction or development shall be located within the area measured fifty (50) feet landward from the top-of-bank of any watercourse.

- b. In Special Floodplain Areas without a designated floodway, no new development shall be permitted unless it can be demonstrated that the cumulative effect of all past and projected development will not increase the BFE by more than one (1) foot.

**C. Approximate Floodplain Area**

1. Description - the areas identified as Zone A in the FIS which are subject to inundation by the 1-percent-annual-chance flood event determined using approximate methodologies. Because detailed hydraulic analyses have not been performed, no BFEs or flood depths are shown.

2. Special Requirements:

- a. No new construction or development shall be located within the area measured fifty (50) feet landward from the top-of-bank of any watercourse.
- b. When available, information from other Federal, State, and other acceptable sources shall be used to determine the BFE, as well as a floodway area, if possible. When no other information is available, the BFE shall be determined by using a point on the boundary of the identified floodplain area which is nearest the construction site in question.

In lieu of the above, the Borough may require the applicant to determine the elevation with hydrologic and hydraulic engineering techniques. Hydrologic and hydraulic analyses shall be undertaken only by professional engineers or others of demonstrated qualifications, who shall certify that the technical methods used correctly reflect currently accepted technical concepts. Studies, analyses, computations, etc., shall be submitted in sufficient detail to allow a thorough technical review by Penn Lake Park Borough.

SECTION 1221      CHANGES IN IDENTIFICATION OF AREA

The identified floodplain area may be revised or modified by the Penn Lake Park Borough Board where studies or information provided by a qualified agency or person documents the need for such revision. However, prior to any such change, approval must be obtained from the FEMA. Additionally, as soon as practicable, but not later than six (6) months after the date such information becomes available, a community shall notify the FEMA of the changes by submitting technical or scientific data.

SECTION 1222      BOUNDARY DISPUTES

Should a dispute concerning any identified floodplain boundary arise, an initial determination shall be made by the Penn Lake Park Borough Floodplain Administrator and any party aggrieved by this decision or determination may appeal to the Penn Lake Park Borough Zoning Hearing Board. The burden of proof shall be on the appellant.

No encroachment, alteration, or improvement of any kind shall be made to any watercourse until all adjacent municipalities which may be affected by such action have been notified by the municipality, and until all required permits or approvals have been first obtained from the Department of Environmental Protection Regional Office.
2. No encroachment, alteration, or improvement of any kind shall be made to any watercourse unless it can be shown that the activity will not reduce or impede the flood carrying capacity of the watercourse in any way.
3. In addition, the FEMA and Pennsylvania Department of Community and Economic Development, shall be notified prior to any alteration or relocation of any watercourse.

B. Technical or scientific data shall be submitted to FEMA for a Letter of Map Revision (LOMR) within six (6) months of the completion of any new construction, development, or other activity resulting in changes in the BFE.

When the application for development, preliminary or final, has been duly approved and proceedings designed to reverse or limit the approval are filed with the Board by persons other than the applicant, the applicant may petition the court having jurisdiction of zoning appeals to order such persons to post a bond as a condition to continuing the proceedings before the Board.

It shall be the burden of the applicant for a bond to prove the appeal is frivolous. After consideration of all the evidence presented, if the court determines that the appeal is frivolous, it shall grant the petition for a bond. The right to petition the court to order the appellants to post bond may be waived by the appellee, but such waiver may be revoked by him if an appeal is taken from a final decision of the court.

1514.3 The question whether or not such petition should be granted and the amount of

the bond shall be within the sound discretion of the court. An order denying a petition for bond shall be interlocutory. An order directing the responding party to post a bond shall be interlocutory.

1514.4 If an appeal is taken by a respondent to the petition for a bond from an order of the court dismissing a zoning appeal for refusal to post a bond and the appellate court sustains the order below to post a bond, the respondent to the petition for a bond, upon motion of the petitioner and after hearing in the court having jurisdiction of zoning appeals, shall be liable for all reasonable costs, expenses, and attorney fees incurred by the petitioner.
